

CCM ID876N TAMPA & SESNON

Project Map & Scope

Project Name CCM ID876N – Tampa & Sesnon

Location The northeast corner of Tampa Ave and Sesnon Blvd in Porter Ranch

Scope Control Center Modernization (CCM) will install new real-time remote monitoring technology at an existing SoCalGas regulator station. Installation includes new underground piping and new control and communication equipment above ground.

Purpose To improve public safety, increase system reliability, and provide the framework for more efficient planning, these enhancements will enable the Gas Operations Control Center monitoring staff to accelerate the recognition, response, and remediation of incidents on the gas distribution pipeline network and support SoCalGas' mission to build the cleanest, safest, and most innovative energy infrastructure company in America.

Anticipated Schedule (Pending Permit)
Work Hours: 7 AM - 3:30 PM (Mon-Fri)
Start Date: July 28, 2025
End Date: October 17, 2025
